Close Home > Worksheets > Math Worksheets > Partitioning Shapes into Fourths What will your child learn through this worksheet? Kids often develop misconceptions about concepts in mathematics, including partitioning 2D shapes. It is important to help them get over those misconceptions. The worksheet gives students plenty of opportunities to work with problems based on geometry. They are encouraged to apply their mathematical knowledge to identify fourths of shapes. Help your student become proficient in geometry with this worksheet. Explore Amazing Worksheets on Geometry Pack your math practice time with fun by exploring shapes in everyday life. VIEW DETAILS How Many Corners and Sides Learn geometry at the speed of lightning by practicing all about corners and sides. VIEW DETAILS Reinforce math concepts by practicing to identify the flat shapes. VIEW DETAILS Practice squares and circles by printing this playful worksheet. VIEW DETAILS This downloadable worksheet is designed to practice rectangles and triangles. VIEW DETAILS Shapes in Our Surroundings Put your skills to the test by practicing to identify shapes in our surroundings. VIEW DETAILS Combine math learning with adventure by solving to identify solid shapes. VIEW DETAILS Learn geometry at the speed of lightning by practicing cones and spheres. VIEW DETAILS Combine math learning with adventure by practicing cylinders and cubes. VIEW DETAILS Classify Shapes as Flats or Solids Focus on core math skills with this fun worksheet by classifying shapes as flats or solids. VIEW DETAILS Identify and Count the Shapes Reveal the secrets of math wizardry by practicing to identify and count the shapes. VIEW DETAILS Create Shapes from Other Shapes Solidify your math skills by practicing to create shapes from other shapes. VIEW DETAILS Help your child revise geometry by making a fish using shapes. VIEW DETAILS Make a Rabbit using Shapes Make a rabbit using shapes by printing this playful worksheet. VIEW DETAILS Kids must make a duck using shapes in this worksheet. VIEW DETAILS Add more arrows to your child's math quiver by sorting real-world shapes. VIEW DETAILS Find Shapes All Around Us Ask your little one to find and identify the different shapes around us to play this game. VIEW DETAILS Match Triangles and Squares Enter the madness of math-multiverse by exploring how to match triangles and squares. VIEW DETAILS Match Rectangles and Circles Learn to solve math problems by matching rectangles and circles. VIEW DETAILS Identify Triangles and Squares Add more arrows to your child's math quiver by identifying triangles and squares. VIEW DETAILS Identify Circles and Rectangles Enjoy the marvel of math-multiverse by exploring how to identify circles and rectangles. VIEW DETAILS Identify Shapes by Their Names Ask your little one to identify shapes by their names to play this game. VIEW DETAILS Unearth the wisdom of mathematics by learning the shapes around us. VIEW DETAILS Take a deep dive into the world of math by matching shapes. VIEW DETAILS Sort 2D Shapes by Their Name Enter the madness of math-multiverse by exploring how to sort 2D shapes by their name. VIEW DETAILS Identify Objects Above and Below Learn to solve problems by identifying objects 'above' and 'below'. VIEW DETAILS Counting Objects Above and Below Begin the exciting journey of becoming a math wizard by counting objects 'above' and 'below'. VIEW DETAILS Place Objects on Different Positions Take a deep dive into the world of math by placing objects on different positions. VIEW DETAILS Identify Position of Object Kids must identify the position of the object to play this game. VIEW DETAILS Identify the Object Next To Help your child master geometry with this 'Identify the Object Next To' game. VIEW DETAILS Not ready to purchase a subscription? Click to download the free sample version Download sample Rectangles can be split into equally sized squares. Squares are actually special rectangles. A square is always a rectangle, so we can say that a rectangle always has squares. See the fact file below for more information on the partitioning rectangles or alternatively, you can download our 26-page Geometry: Partitioning Rectangles CCSS 2.G.2 worksheet pack to utilise within the classroom or home environment. Key Facts & Information LEARNING OBJECTIVE: At the end of the lesson, the student will learn how to partition rectangles into same-sized squares by knowing the concept of dividing the shape into rows and columns. A NOTE FOR THE TEACHER: When partitioning rectangles, take note of the following: Start by reminding your student that a square is a rectangle, and therefore, we can find squares inside rectangles. Remember that a row navigates from left to right. Remember that a column navigates from top to bottom. THEORY: Rectangles can be split into equally sized squares. Squares are actually special rectangles. A square is always a rectangle, so we can say that a rectangle always has squares. To divide the rectangle into same-sized squares, we must partition the rectangle into rows and columns. Rows split the rectangle horizontally from left to right. Columns split the rectangle vertically from top to bottom. Suppose that we want to split the rectangle into 2 rows and 3 columns: Geometry: Partitioning Rectangles CCSS 2.G.2 Worksheets This is a fantastic bundle that includes everything you need to know about Geometry: Partitioning Rectangles across 26 in-depth pages. These are ready-to-use worksheets that align with the Common Core CCSS code 2.G.2 for Geometry. Partitioning Rectangles.
